

Afghan Kush

is a pure Indica classic, cherished for its earthy hash aroma and deeply calming effects. It produces thick, compact buds dripping with resin, ideal for hash and extract production. Flowering takes 8 weeks, yielding 500–600 g/m² indoors. THC levels reach up to 24%, delivering full-body relaxation and stress relief. A timeless strain for connoisseurs of traditional genetics.

Agent Orange

combines bright citrus aroma with high yields and balanced potency. The buds are dense and colorful, with orange hairs and an intense tangerine scent. Flowering in 9 weeks, it offers 550–600 g/m² and THC up to 26%. The high is euphoric, creative, and refreshing, ideal for daytime use. A vibrant strain for flavor lovers.

AK-47

is a legendary hybrid that blends power and precision, delivering rich aromas of pine, spice, and citrus. Its dense buds glisten with trichomes and offer THC levels reaching 27%. Flowering finishes in 8–9 weeks, with yields of 550 g/m² indoors. Effects are long-lasting, combining cerebral clarity with deep relaxation. Perfect balance between strength and productivity.

Alien OG

offers interstellar potency and resin production, reaching up to 28% THC. The aroma mixes pine, citrus, and sweet fuel with a hint of spice. Flowering lasts 9 weeks with 500–600 g/m² yields. The high is fast-hitting and powerful, blending euphoric uplift with cosmic body relaxation. A true hybrid for experienced users.

Amnesia Haze

is an award-winning sativa with world-famous flavor and effect. Expect tall plants and long, resin-coated colas bursting with citrus and spice. Flowering takes around 10 weeks, yielding up to 650 g/m² indoors. THC reaches 28%, offering euphoric, creative energy that lasts for hours. Ideal for experienced smokers and haze enthusiasts.

Amnesia Hy-Pro

is a vigorous sativa hybrid with explosive growth and a distinct citrus-haze scent. Flowering in about 9–10 weeks, it delivers 600 g/m² of dense, resinous buds. THC levels climb to 27%, producing a clear, energetic, and long-lasting high. The flavor combines lemon, herbs, and incense for a classic Dutch profile.

Amnesia Lemon

merges the electric high of Amnesia with fresh lemon zest and sweetness. Plants grow tall and branched, producing 600 g/m^2 in about 9 weeks. THC content hits up to 27%, resulting in uplifting, mind-clearing effects. Its flavor is tangy, herbal, and unmistakably refreshing. Perfect for daytime creativity and focus.

Animal Mintz

delivers dessert-level flavor and exceptional potency, reaching up to 30% THC. The aroma blends mint, cookies, and vanilla cream, filling the room with sweetness. Flowering in 8–9 weeks, it yields around 550 g/m² of dense, frosted buds. The high is relaxing yet euphoric, perfect for unwinding in style.

Apple Fritter

is a balanced hybrid known for its baked-apple aroma and strong, uplifting buzz. With THC levels soaring to 29%, it offers both creative stimulation and deep relaxation. Flowering completes in 9 weeks with yields up to 600 g/m^2 . The flavor is sweet, creamy, and fruity with a hint of spice. A modern classic in dessert genetics.

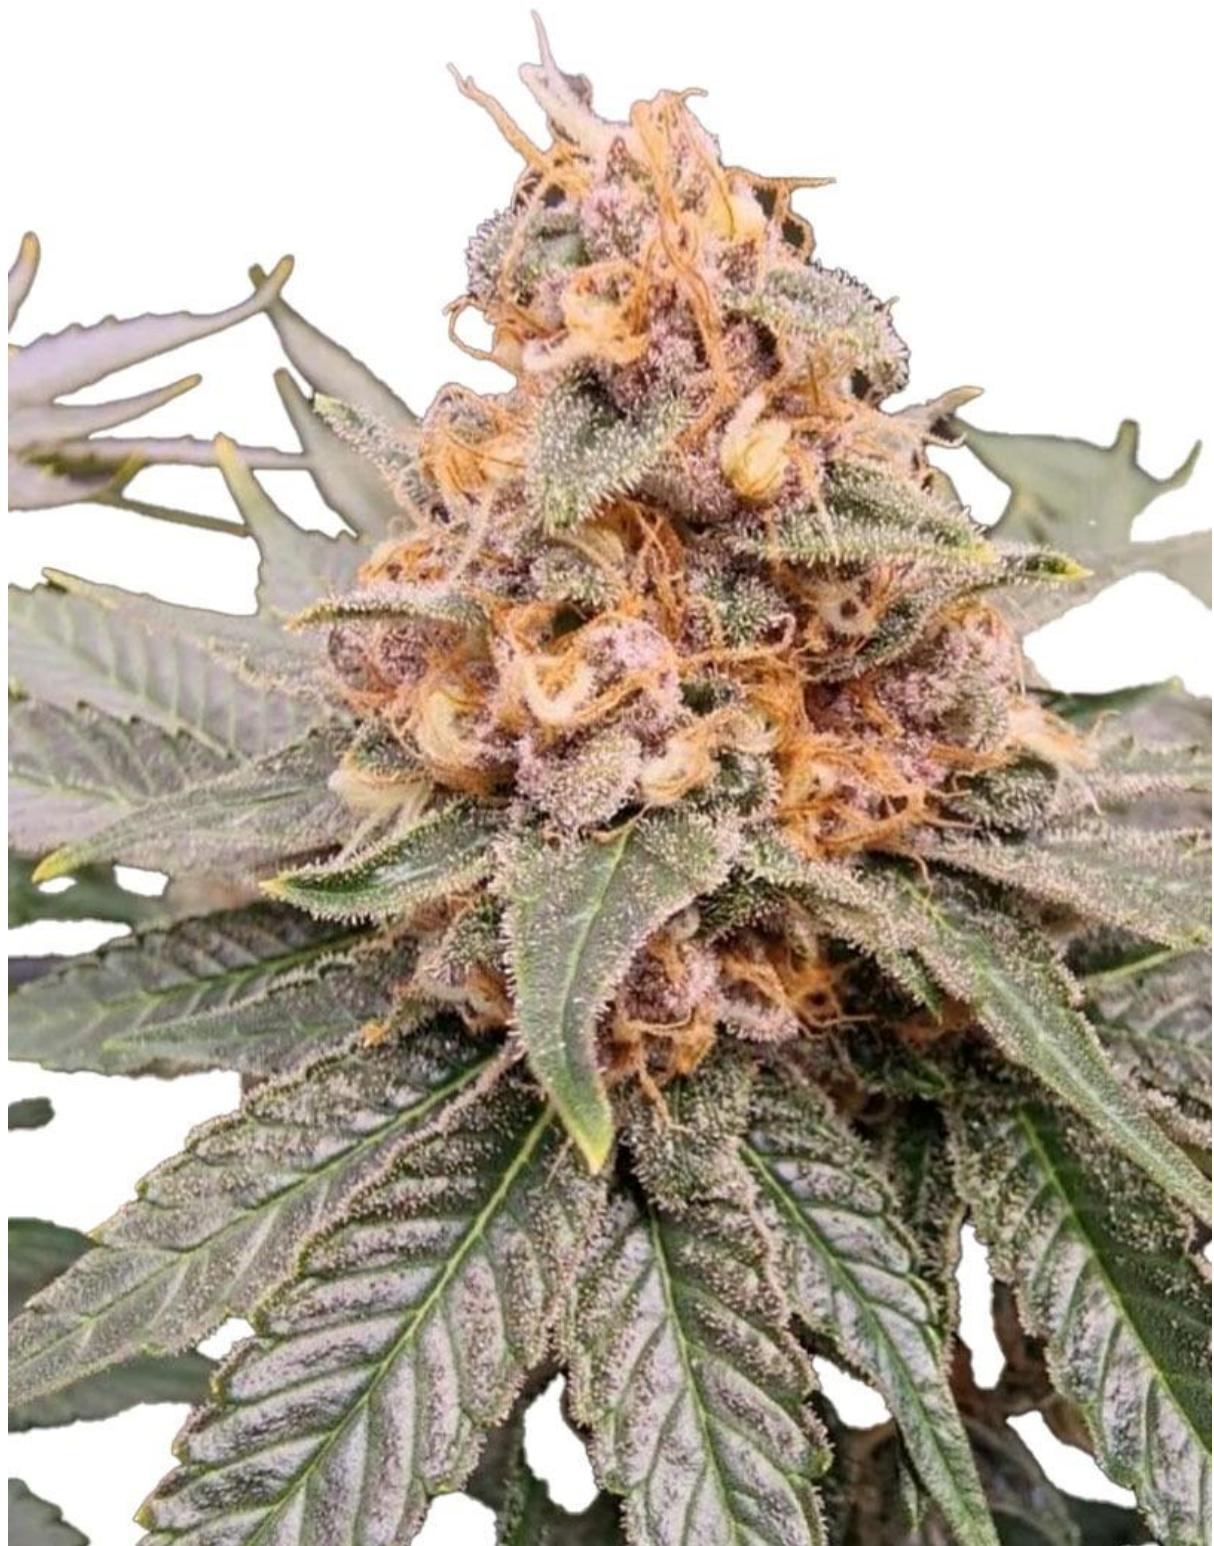

Banana Punch

brings tropical sweetness and colorful, resin-drenched buds. Flowering takes about 9 weeks, yielding 550 g/m² with THC up to 28%. The aroma blends banana, candy, and spice in a luscious mix. The high is relaxing and euphoric, melting stress while keeping the mind happy and alert.

Biscotti Mint

combines two dessert legends for one unforgettable experience. It delivers creamy cookie flavor with minty freshness and THC up to 30%. Flowering in 9 weeks, it produces dense buds sparkling with resin. The high is calm, euphoric, and long-lasting — perfect for evening indulgence.

Black Cherry Punch

delights the senses with deep purple hues and a fruity, grape-cherry aroma. Flowering in 8–9 weeks, it yields up to 550 g/m² and reaches 28% THC. The flavor is sweet and rich, with a smooth smoke and relaxing body effects. A striking strain for color and potency lovers alike.

Blue Dream

combines the best of Blueberry and Haze in a balanced, high-yielding hybrid. It produces 600 g/m² in 9–10 weeks with 26% THC. The aroma mixes sweet berries and citrus with a subtle earthy background. The effects are creative, uplifting, and long-lasting, making it perfect for daily enjoyment.

Blue Zushi

stands out with exotic blue hues, fuel aroma, and refined Kush undertones. Flowering in about 9 weeks, it produces 550 g/m^2 of dense, frosty buds. THC levels reach up to 30%, offering a heavy yet balanced hybrid experience. Expect calming euphoria and rich, layered flavor with notes of berry and diesel.

Blueberry

is a timeless Indica famous for its unmistakable sweet berry flavor and soothing effects. Compact plants finish in 8–9 weeks, yielding up to 550 g/m² of aromatic buds. THC reaches 25%, producing a calm, euphoric body high with a gentle, fruity taste. A must-have strain for flavor purists and relaxation seekers.

Bruce Banner

is an absolute powerhouse known for strength and speed. This hybrid produces huge, resin-soaked buds with a pungent diesel-strawberry aroma. Flowering takes 8–9 weeks with yields up to 650 g/m^2 . THC levels soar to 32%, delivering a euphoric rush followed by a relaxing, balanced finish. A monster strain for potency lovers.

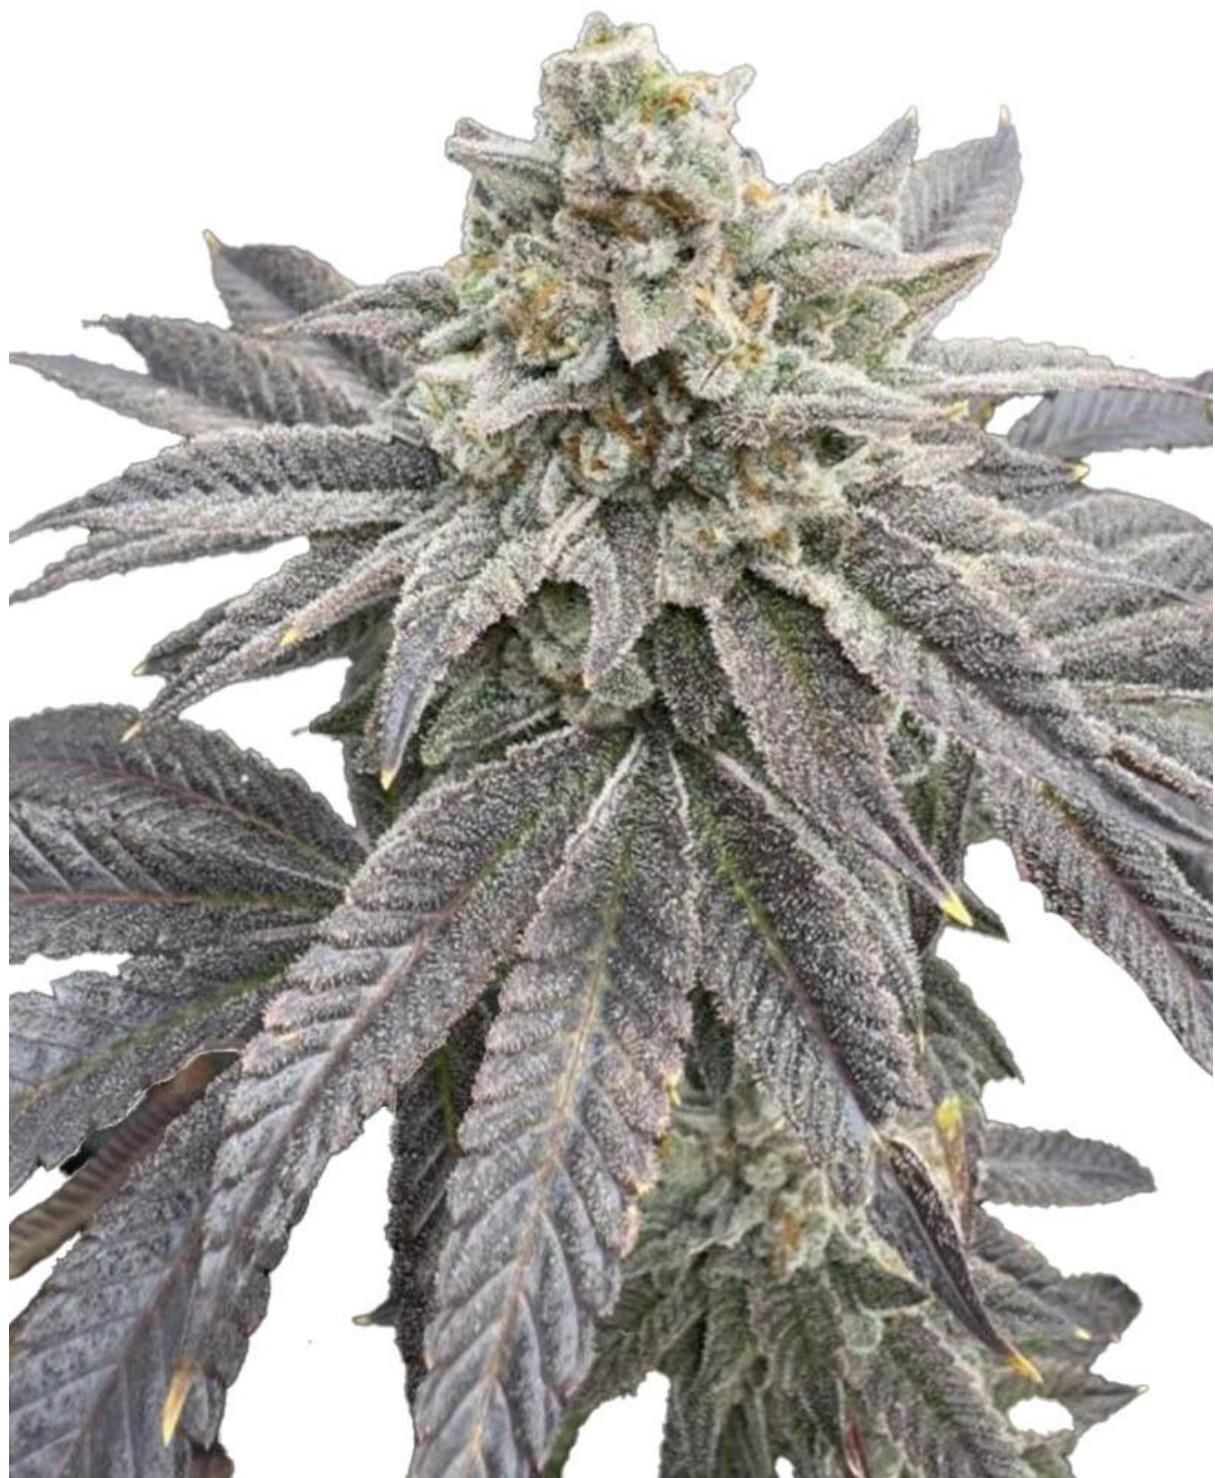

Cap Junky

is a rare, high-THC hybrid famed for its dense buds and sharp, gassy aroma. Flowering in 9–10 weeks, it produces up to 600 g/m² indoors. THC can reach a staggering 32%, offering intense euphoria and body-melting relaxation. Its flavor combines fuel, citrus, and spice in a complex, powerful smoke.

Cement Shoes

is an Indica-heavy hybrid that hits hard with full-body calm. The buds are compact, frosty, and aromatic, mixing notes of citrus, vanilla, and earth. Flowering in 8–9 weeks, it delivers up to 550 g/m² and THC levels around 29%. The high is deeply sedating — perfect for relaxation and rest.

Cereal Milk

offers creamy sweetness and dessert-like flavor wrapped in top-shelf potency. It flowers in 9 weeks, yielding up to 600 g/m^2 of dense, resinous buds. The aroma is sugary and fruity with vanilla undertones. With THC levels near 30%, the high is balanced, euphoric, and deeply satisfying.

Cherry Pie

is a flavorful hybrid with dense buds and a delicious pastry-cherry aroma. Flowering in 8–9 weeks, it produces up to 550 g/m² of sticky, colorful buds. THC levels reach 27%, offering a joyful, relaxed, and uplifting high. A treat for both the palate and the eyes.

Colombian Haze

is a true sativa classic, prized for its electric, long-lasting high. Plants grow tall and vigorous, flowering in 10–11 weeks with yields up to 600 g/m². THC levels reach 28%, producing energetic, euphoric effects and clear mental focus. Aromas of spice, lemon, and incense fill the air.

Critical 2.0

is a high-yielding hybrid with incredible productivity and stability. Flowering in 7–8 weeks, it produces up to 700 g/m² indoors. THC content peaks at 25%, with sweet citrus and woody aromas. The high is balanced and relaxing, ideal for commercial growers seeking performance and quality.

DoSiDos

is a modern Indica dominant strain with cookie sweetness and creamy earthiness. Flowering in 9 weeks, it delivers up to 550 g/m² and THC up to 30%. The buds are dense, sticky, and covered in frosty trichomes. Its effects are strong, relaxing, and blissfully long-lasting.

Durban Poison

is a pure African sativa known for its uplifting, clear-headed high. Tall, vigorous plants flower in 9–10 weeks, yielding 550 g/m² of resin-rich buds. THC levels reach 26%, offering energetic and creative effects. The flavor is sweet, earthy, and anise-like with a refreshing finish.

Gary Payton

is a potent hybrid named for its legendary punch and flawless balance. It produces thick, frosty buds with citrus, diesel, and spice aromas. Flowering in 9 weeks, it yields around 600 g/m^2 and reaches THC up to 30%. The high is euphoric, focused, and long-lasting — perfect for seasoned users.

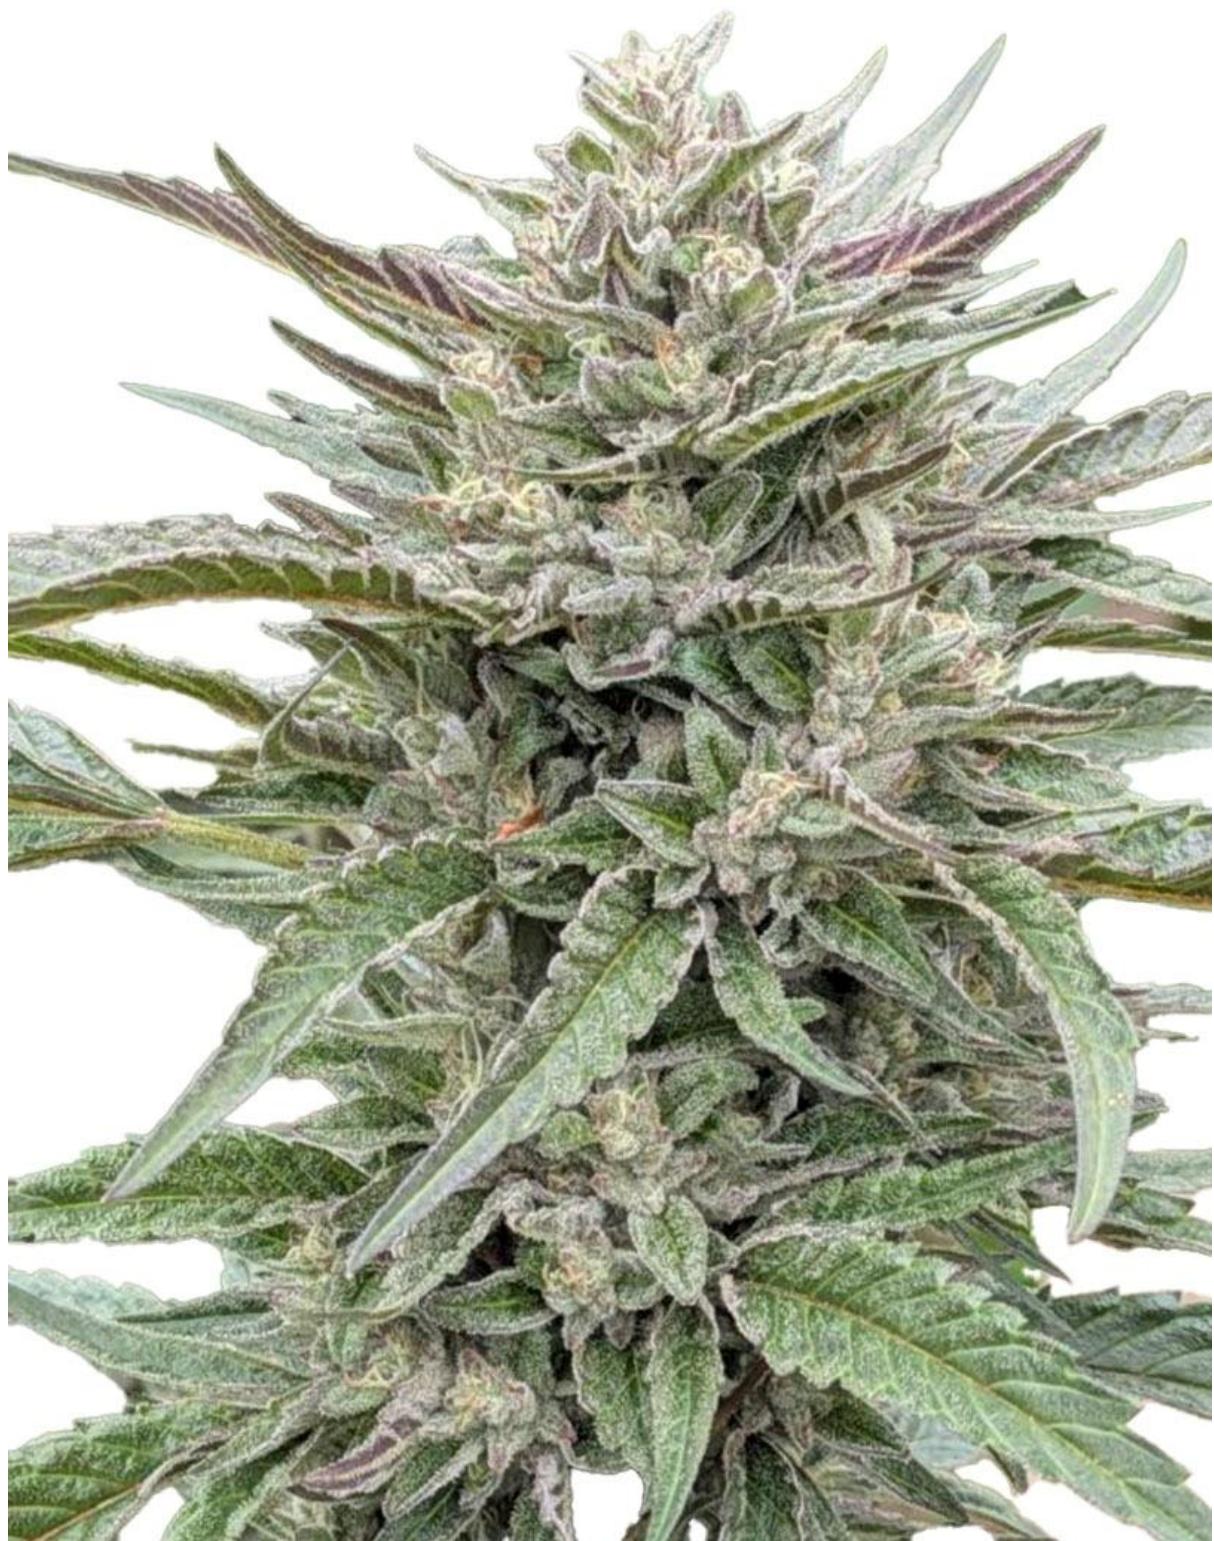

Gelato

is a creamy, dessert-flavored powerhouse with 28–30% THC. It flowers in 8–9 weeks, yielding up to 600 g/m² of dense, resinous buds. The aroma is a mix of vanilla, berries, and citrus. Its effects are balanced and euphoric, melting stress while keeping the mind bright.

GMO

also known as Garlic Cookies, is famous for its intense aroma and outrageous potency. Flowering in 9–10 weeks, it produces up to 600 g/m^2 with THC around 31%. The buds are sticky, pungent, and heavy with fuel, garlic, and spice. Its effects are deeply relaxing and long-lasting — a true knockout.

Hash Passion

is bred for resin production and traditional hash flavor. Compact and easy to grow, it finishes flowering in 8 weeks with yields up to 500 g/m². THC reaches 23%, delivering a heavy, sedative body stone. Its earthy, spicy aroma and thick trichome coverage make it perfect for concentrates.

Jealousy

is a powerhouse hybrid recognized for its top-tier potency and visual appeal. Buds are dense, colorful, and dripping with resin, releasing a creamy cookie and fruit aroma. Flowering completes in around 9 weeks with yields reaching up to 600 g/m^2 . THC levels soar to 30%, providing a strong euphoric lift followed by a calm, balanced finish. Smooth, flavorful, and deeply satisfying, Jealousy is a symbol of modern West Coast excellence.

Lemon Cherry Gelato

delivers dessert sweetness with a zesty twist of citrus and ripe cherries. Its buds are thick and heavily frosted, exuding creamy fruit and subtle gas notes. Flowering in 8–9 weeks, it produces up to 600 g/m^2 of premium-grade flowers. THC levels climb to 29%, creating joyful, creative, and deeply relaxing effects. A beautiful blend of flavor, strength, and aroma in perfect balance.

Lemon Pie

captures with its fresh lemon zest aroma and tangy-sweet flavor profile. Flowering completes in about 9 weeks with yields around 550 g/m^2 of compact, resinous buds. THC reaches up to 26%, producing clear-headed energy and mental uplift. The taste is creamy citrus with a hint of spice on exhale. Perfect for daytime focus and a refreshing smoking experience.

Marshmallow OG

delights with its sugary-sweet aroma and creamy, dessert-like smoke. Flowering in roughly 9 weeks, it produces 550 g/m² of dense, frosty buds coated in sticky resin. THC content reaches up to 30%, bringing a deeply calming, happy high. Notes of vanilla, fruit, and gas make each puff rich and memorable. A soothing strain perfect for indulgent relaxation.

Maui Wowie

brings the taste of the tropics with its bright pineapple and citrus bouquet. This classic sativa flowers in 9–10 weeks, yielding up to 600 g/m² of vibrant, aromatic buds. THC levels reach 26%, creating uplifting, energetic, and creative effects. Its tropical flavor and gentle body ease make it perfect for daytime adventures. A refreshing legend that never fades.

Miracle Alien Cookies

fuses cosmic flavor with extraordinary potency, hitting THC levels up to 30%. Buds form dense and crystalline with aromas of citrus, cookies, and diesel. Flowering in about 9 weeks, it yields up to 550 g/m² of top-quality harvests. The high is intense yet smooth, offering euphoria with relaxed focus. A modern classic that lives up to its legendary reputation.

Northern Lights

remains one of the most reliable Indicas in cannabis history. Compact and easy to grow, it finishes flowering in just 8 weeks with up to 550 g/m² of dense buds. THC content peaks around 25%, offering soothing full-body relaxation and gentle euphoria. The aroma is sweet and spicy with earthy undertones. A classic for peace, rest, and resin-rich harvests.

OG Kush

embodies the essence of California cannabis with its gassy, pine-heavy aroma. Flowering in about 9 weeks, it produces up to 550 g/m² of thick, resinous buds. THC levels hit 29%, offering a powerful, euphoric, and calming experience. The flavor is earthy, citrusy, and unmistakably classic. A timeless strain with unmatched potency and prestige.

Oreoz

offers unmatched dessert flavor and potency in one frosty package. The buds are chunky, sticky, and coated with trichomes that glisten like sugar. Flowering takes 9 weeks, yielding around 600 g/m^2 with THC levels reaching 30%. The aroma combines chocolate, cream, and earthy undertones. It delivers a smooth, relaxing, and euphoric high that lasts for hours.

Permanent Marker

is a bold, high-THC hybrid with intense fuel and candy aromas. Its flowers are dense and resin-heavy, finishing in 9 weeks with yields around 600 g/m^2 . THC levels reach 31%, offering an exhilarating wave of euphoria and body calm. The smoke is thick, flavorful, and long-lasting. A modern masterpiece crafted for potency and aroma lovers alike.
